

EMPOWERING THE FUTURE WITH AI & AUTOMATION

SurensInffotek is a next-generation technology company specializing in Artificial Intelligence and advanced automation solutions.

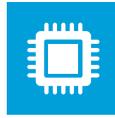

Core Services Portfolio

(AI | APA | QA | Industry 4.0)

Robotic Process Automation

- Automation Consulting & Strategy
- Agentic Process Automation
- RPA | Hyper Automation
- Bots Development
- RPA COE setup

Independent Verification & Validation (IV & V)

- Functional & Non-Functional Testing
- LLM, AI Testing
- Automation (Functional, Mobile, Web Services)
- Manual (Web, Desktop, Mobile)
- Performance Testing & Security Testing

Artificial Intelligence

- AI Consulting
- GEN AI / LLM
- Text/Data Analytics
- Voice AI
- Vision AI
- Custom GPT

Smart Manufacturing | Industry 4.0

- Business Intelligence & KPI Dashboards
- Enterprise App Development

Web & Mobile App Development Offerings

Android App Development

We are well versed with the Android ecosystem with experts in core java and Kotlin programming to build innovative android apps

Using technologies like React, Ionic, Phonegap, Sencha etc., We have build platform agnostic applications with superior performance

Web Development

By applying best-in-class technology & engaging highly web developers, we develop custom and fully interactive websites perfectly conforming to the client requirements

Expertise in custom mobile app development for 12+ business verticals like ecommerce, banking, IT, healthcare, travel and logistics, etc.

Create aesthetically appealing UI interfaces along with user friendly UX using latest design philosophy like Material Design, Flat Design, etc

Custom development of interactive applications using augmented, virtual, and mixed reality for smartphones, tablets, headset devices, wearable technologies, and other devices

Integrations with 3rd party APIs including Google maps, social media platforms, location-based services, databases, payment gateways, internet connectivity, and more

Smart Factory Digital Transformation Industry 4.0 Services

Consulting Services

- Digital Maturity Assessment
- Digital Vision Definition & Roadmap
- Solution discovery & requirement definition
- Digital Platform Evaluation
- Reference Architecture definition

Managed Services

- Operations Transition
- Service Model Definition & Management
- SLA Definition, Compliance & Reporting
- Operations Monitoring
- Continuous Improvement

Digital Factory Services

- Target architecture definition
- Infra & Cloud Connectivity
- IT/OT, Industrial Data Centre Establishment
- Machine Connectivity
- Platform Implementation/Configuration
- Hybrid Agile Execution

Co-Innovation

- Center of Excellence
- Research – Technology & Market
- Use case definition
- Solution Definition
- PoCs/Pilots
- Impact Analysis
- Partnerships

PMO Services

- Program Management
- Project Management
- Governance
- Vendor Management
- Change Management

Data Intelligence

- Production Analytics
- Performance Analytics
- Maintenance Analytics
- Quality Analytics

Gen AI | LLM | AI Solutions

Data Intelligence

- Production Analytics
- Performance Analytics
- Maintenance Analytics
- Quality Analytics

Co-Innovation

- Center of Excellence
- Research – Technology & Market
- Use case definition
- Solution Definition
- PoCs/Pilots
- Impact Analysis
- Partnerships

AI Center of Excellence

Consulting & Strategy

- AI adoption roadmaps
- Business process automation consulting
- Data strategy & AI readiness assessment
- Custom AI solution design
- LLM Testing Strategy

AI-Powered S/W Development

- Custom AI/ML model development
- AI integration into existing systems
- End-to-end AI application development
- Custom GPT & virtual assistants
- Voice assistants
- Document processing & AI-powered search
- Facial recognition & Vision AI
- Object detection & classification

Large Language Model (LLM) Services

- Custom LLM Development & Fine-Tuning
- Fine-tuning open-source models
- Instruction-tuning for task-specific performance
- Retrieval-Augmented Generation (RAG) pipelines
- Enterprise LLM Solutions

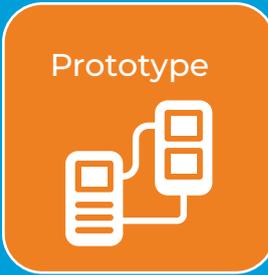

Managed Services

- Operations Transition
- Service Model Definition & Management
- SLA Definition, Compliance & Reporting
- Operations Monitoring
- Continuous Improvement

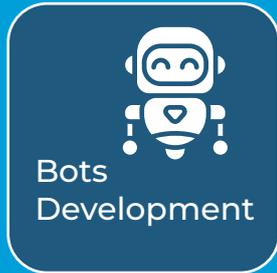

Agentic Process Automation | Hyper Automation Services

- Develop Strategy & Road map
- Implement RPA process
- Gap Analysis & Recommendations
- Pre-Analysis

- Minimum viable product
- Challenges & Recommendations

- Identify the suitable workflows
- Develop the Bots
- Orchestration

- Identify the most suitable tools based on the coverage

Independent Verification & Validation Services

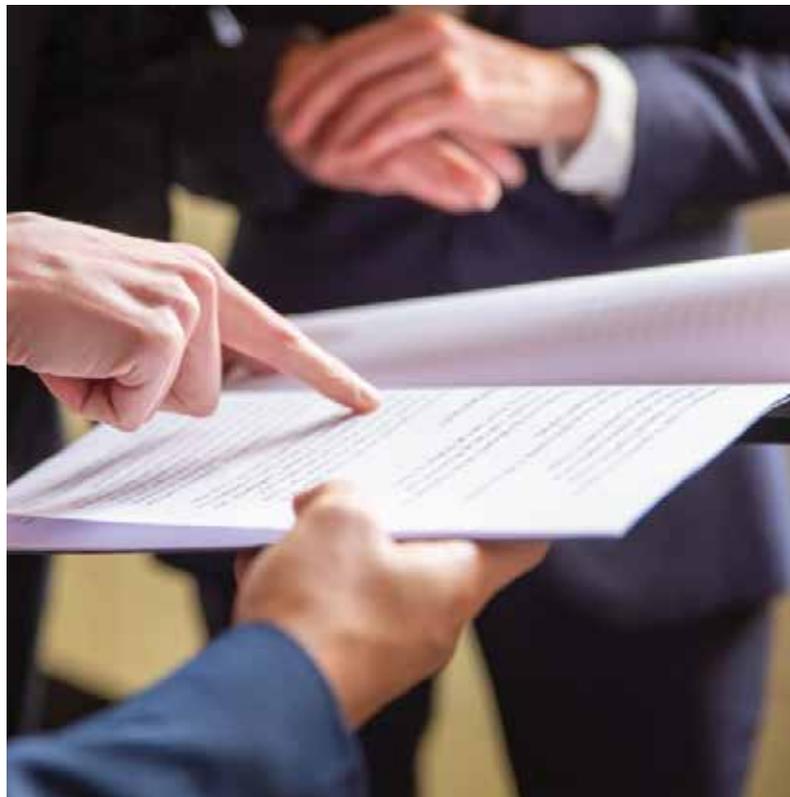

Skilled Professionals Outsourcing

SurensInffotek, an ISO certified software company provides the best of the class technical staff to enable the companies to quickly fulfil the resource requirements with utmost quality & reliability

Technologies

- Full Stack : REACT JS | Angular Java Node JS
- Machine Learning | Deep Learning | CV
- Selenium | Python, Ruby | Java Script
- Microsoft .NET DEVOPS | AWS | Azure
- IBM tools – APIC/ Data power /ACE/IIB/MQ
- RPA: UiPath |Automation Anywhere
- ERP Solutions: SAP Oracle |PeopleSoft |SAS
- MuleSoft | Service Now Workday
- SAP-FICO/SD/ MM/BASIS/ABAP
- Manual/ Automation, Performance, Security

Roles

- Developers (REACT JS/Python)
- BI/Data Analytics/ RPA/ML/AI
- DEVOPS/CI/CD
- Cloud Architect / Consultants
- DBA's
- Test Architects / Consultants
- Business Analyst
- SDET/Testers / Leads/SME's
- Developers (Web/Mob/API)
